**Subject: Invitation as a Resource Person for "Certificate Program on Data Science."**

Respected Sir,

We are pleased to invite you as a Resource Person for "Certificate Program on Data Science." for our Second Year students scheduled on **Monday 13/02/2023 to Friday 17/02/2023**. Your expertise and knowledge in the area would add a great value to the one and all, especially the building engineers of the country who require the guidance and path-breaking ideas to lead their way through the tough competition in the Global market on this day.

With your vast and in-depth knowledge in the area, you would be expected to deliver the Session on "Data Science" as we are aware of your great contribution to this field of work.

We look forward to your presence and guidance in making the event successful.

Thanking you.

### Syllabus

#### **Day 1: (Time: 10:00 AM to 1:00 and 02:00 PM to 05:00 PM)**

##### • Introduction to Data science

In a world of data space where organizations deal with petabytes and exabytes of data, the era of Big Data emerged, the essence of its storage also grew. It was a great challenge and concern for industries for the storage of data until 2010. Now when frameworks like Hadoop and others solved the problem of storage, the focus shifted to processing of data. Data Science plays a big role here. All those fancy Sci-fi movies you love to watch around can turn into reality by Data Science. Nowadays its growth has been increased in multiple ways and thus one should be ready for our future by learning what it is and how can we add value to it. Without any hunches, let's dive into the world of Data Science. After touching to slightest idea, you might have ended up with many questions like what is Data Science? Why we need it? How can I be a Data Scientist?? etc? So let's clear out ourselves from this baffle.

Data science is a field that involves using statistical and computational techniques to extract insights and knowledge from data. It encompasses a wide range of tasks, including data cleaning and preparation, data visualization, statistical modeling, machine learning, and more. Data scientists use these techniques to discover patterns and trends in data, make predictions, and support decision-making. They may work with a variety of data types, including structured data (such as numbers and dates in a spreadsheet) and unstructured data (such as text, images, or audio). Data science is used in a wide range of industries, including finance, healthcare, retail, and more.

Data science is a multidisciplinary field that uses statistical and computational methods to extract insights and knowledge from data. It involves a combination of skills and knowledge from various fields such as statistics, computer science, mathematics, and domain expertise.

The process of data science involves several steps, including data collection, cleaning, exploration, analysis, and interpretation. These steps are often iterative, and the process may be refined based on the results obtained.

## • Power of data science

### Why Data Science? 8 Ways a Data Scientist Can Add Value to Business

#### 1. Empowering Management and Officers to Make Better Decisions

An experienced data scientist is likely to be a trusted advisor and strategic partner to the organization's upper management by ensuring that the staff maximizes their analytics capabilities. A data scientist communicates and demonstrates the value of the institution's data to facilitate improved decision-making processes across the entire organization, through measuring, tracking, and recording performance metrics and other information.

#### 2. Directing Actions Based on Trends—which in Turn Help to Define Goals

A data scientist examines and explores the organization's data, after which they recommend and prescribe certain actions that will help improve the institution's performance, better engage customers, and ultimately increase profitability.

#### 3. Challenging the Staff to Adopt Best Practices and Focus on Issues That Matter

One of the responsibilities of a data scientist is to ensure that the staff is familiar and well-versed with the organization's analytics product. They prepare the staff for success with the demonstration of the effective use of the system to extract insights and drive action. Once the staff understands the product capabilities, their focus can shift to addressing key business challenges.

#### 4. Identifying Opportunities

During their interaction with the organization's current analytics system, data scientists question the existing processes and assumptions for the purpose of developing additional methods and analytical algorithms. Their job requires them to continuously and constantly improve the value that is derived from the organization's data.

#### 5. Decision Making with Quantifiable, Data-driven Evidence

With the arrival of data scientists, data gathering and analyzing from various channels has ruled out the need to take high stake risks. Data scientists create models using existing data that simulate a variety of potential actions—in this way, an organization can learn which path will bring the best business outcomes.

## 6. Testing These Decisions

Half of the battle involves making certain decisions and implementing those changes. What about the other half? It is crucial to know how those decisions have affected the organization. This is where a data scientist comes in. It pays to have someone who can measure the key metrics that are related to important changes and quantify their success.

## 7. Identification and Refining of Target Audiences

From Google Analytics to customer surveys, most companies will have at least one source of customer data that is being collected. But if it isn't used well—for instance, to identify demographics—the data isn't useful. The importance of data science is based on the ability to take existing data that is not necessarily useful on its own and combine it with other data points to generate insights an organization can use to learn more about its customers and audience.

A data scientist can help with the identification of the key groups with precision, via a thorough analysis of disparate sources of data. With this in-depth knowledge, organizations can tailor services and products to customer groups, and help profit margins flourish.

## 8. Recruiting the Right Talent for the Organization

Reading through resumes all day is a daily chore in a recruiter's life, but that is changing due to big data. With the amount of information available on talent—through social media, corporate databases, and job search websites—data scientists can work their way through all these data points to find the candidates who best fit the organization's needs.

By mining the vast amount of data that is already available, in-house processing for resumes and applications—and even sophisticated data-driven aptitude tests and games—data science can help your recruitment team make speedier and more accurate selections.

## **Day 2: (Time: 10:00 AM to 1:00 and 02:00 PM to 05:00 PM)**

### **• Machine learning**

Machine Learning tutorial covers basic and advanced concepts, specially designed to cater to both students and experienced working professionals.

This machine learning tutorial helps you gain a solid introduction to the fundamentals of machine learning and explore a wide range of techniques, including supervised, unsupervised, and reinforcement learning.

Machine learning (ML) is a subdomain of artificial intelligence (AI) that focuses on developing systems that learn—or improve performance—based on the data they ingest. Artificial intelligence is a broad word that refers to systems or machines that resemble human intelligence. Machine learning and AI are frequently discussed together, and the terms are occasionally used interchangeably, although they do not signify the same thing. A crucial distinction is that, while all machine learning is AI, not all AI is machine learning.

### **What is Machine Learning?**

Machine Learning is the field of study that gives computers the capability to learn without being explicitly programmed. ML is one of the most exciting technologies that one would have ever come across. As it is evident from the name, it gives the computer that makes it more similar to humans: The ability to learn. Machine learning is actively being used today, perhaps in many more places than one would expect.

## **Day 3: (Time: 10:00 AM to 1:00 and 02:00 PM to 05:00 PM)**

### **• Introduction to R Programming**

R is an open-source programming language that is widely used as a statistical software and data analysis tool. R generally comes with the Command-line interface. R is available across widely used platforms like Windows, Linux, and macOS. Also, the R programming language is the latest cutting-edge tool.

It was designed by Ross Ihaka and Robert Gentleman at the University of Auckland, New Zealand, and is currently developed by the R Development Core Team. R programming

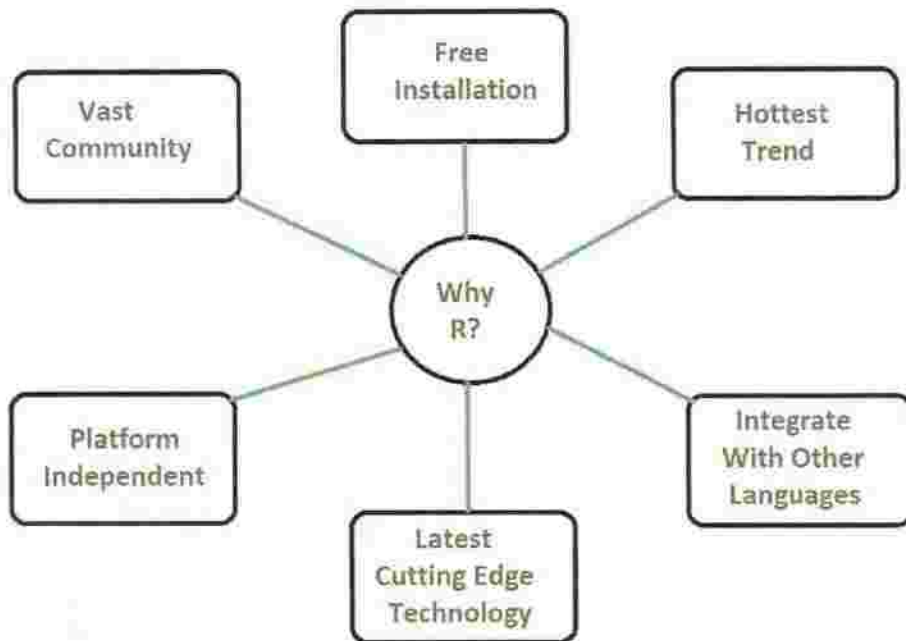

language is an implementation of the S programming language. It also combines with lexical scoping semantics inspired by Scheme. Moreover, the project conceived in 1992, with an initial version released in 1995 and a stable beta version in 2000.

*Why*

*R*

*Programming*

*Language?*

1. R programming is used as a leading tool for machine learning, statistics, and data analysis. Objects, functions, and packages can easily be created by R.
2. It's a platform-independent language. This means it can be applied to all operating system.
3. It's an open-source free language. That means anyone can install it in any organization without purchasing a license.
4. R programming language is not only a statistic package but also allows us to integrate with other languages (C, C++). Thus, you can easily interact with many data sources and statistical packages.
5. The R programming language has a vast community of users and it's growing day by day.
6. R is currently one of the most requested programming languages in the Data Science job market that makes it the hottest trend nowadays.

• **Hands on training Program**

## Day 4: (Time: 10:00 AM to 1:00 and 02:00 PM to 05:00 PM)

### • Introduction to Python

Python is a widely used general-purpose, high level programming language. It was created by Guido van Rossum in 1991 and further developed by the Python Software Foundation. It was designed with an emphasis on code readability, and its syntax allows programmers to express their concepts in fewer lines of code.

Python is a programming language that lets you work quickly and integrate systems more efficiently.

There are two major Python versions: Python 2 and Python 3. Both are quite different.

Beginning with Python programming:

### 1) Finding an Interpreter:

Before we start Python programming, we need to have an interpreter to interpret and run our programs. There are certain online interpreters like <https://ide.geeksforgeeks.org/> that can be used to run Python programs without installing an interpreter.

*Windows:* There are many interpreters available freely to run Python scripts like IDLE (Integrated Development Environment) that comes bundled with the Python software downloaded from <http://python.org/>.

*Linux:* Python comes preinstalled with popular Linux distros such as Ubuntu and Fedora. To check which version of Python you're running, type "python" in the terminal emulator. The interpreter should start and print the version number.

*macOS:* Generally, Python 2.7 comes bundled with macOS. You'll have to manually install Python 3 from <http://python.org/>.

## LANGUAGE FEATURES

- Interpreted
  - There are no separate compilation and execution steps like C and C++.
  - Directly *run* the program from the source code.
  - Internally, Python converts the source code into an intermediate form called bytecodes which is then translated into native language of specific computer to run it.
  - No need to worry about linking and loading with libraries, etc.
- Platform Independent
  - Python programs can be developed and executed on multiple operating system platforms.
  - Python can be used on Linux, Windows, Macintosh, Solaris and many more.
- Free and Open Source; Redistributable
- High-level Language
  - In Python, no need to take care about low-level details such as managing the memory used by the program.
- Simple

- Closer to English language; Easy to Learn
- More emphasis on the solution to the problem rather than the syntax
- Embeddable
  - Python can be used within C/C++ program to give scripting capabilities for the program's users.
- Robust:
  - Exceptional handling features
  - Memory management techniques in built
- Rich Library Support
  - The Python Standard Library is very vast.
  - Known as the "batteries included" philosophy of Python ;It can help do various things involving regular expressions, documentation generation, unit testing, threading, databases, web browsers, CGI, email, XML, HTML, WAV files, cryptography, GUI and many more.
  - Besides the standard library, there are various other high-quality libraries such as the Python Imaging Library which is an amazingly simple image manipulation library.

#### • Pandas

What is Pandas?

Pandas is a Python library used for working with data sets.

It has functions for analyzing, cleaning, exploring, and manipulating data.

The name "Pandas" has a reference to both "Panel Data", and "Python Data Analysis" and was created by Wes McKinney in 2008.

Why Use Pandas?

Pandas allows us to analyze big data and make conclusions based on statistical theories.

Pandas can clean messy data sets, and make them readable and relevant.

Relevant data is very important in data science.

## Day 5: (Time: 10:00 AM to 1:00 and 02:00 PM to 05:00 PM)

### • Data science with Python

#### Why Use Python For Data Science?

Python is in demand for the past few years and the recent survey also suggested the same, Python leads the chart among the top programming languages in both the TIOBE index & PYPL Index. However, to support this, there are 5 concrete reasons behind this,

1. **Easy To Learn:** Being an open-source platform, Python has a simple and intuitive syntax that is easy to learn and read. This makes it a great language for beginners to learn data science.
2. **Cross-Platform:** Being a developer, you don't need to worry about the data types. The reason is, Python allows developers to run the code on Windows, Mac OS X, UNIX, and Linux.
3. **Portable:** Being an easy & beginner's friendly programming language, Python is highly portable in nature which means that a developer can run their code on different machines without making any further changes.
4. **Extensive Library:** Python has several powerful libraries that make data analysis and visualization easy. Pandas is a library for data manipulation and analysis, NumPy is a library for numerical computation, and Matplotlib is a library for data visualization.
5. **Community Support:** Python has a large and active community that supports and contributes to the development of various libraries and tools for data science. This community has created many useful libraries, including Pandas, NumPy, matplotlib, and SciPy, which are widely used in data science.

However, there are a lot more reasons to opt for Python for Data Science such as OOP, expressive language, the ability to allocate memory dynamically, etc. and that's the reason for using Python Programming Language for Data Science applications.

#### Benefit Of Using Python For Data Science

In summary, Python is a popular language for data science because it is easy to learn, has a large and active community, offers powerful libraries for data analysis and visualization, and has excellent machine-learning libraries.

In terms of application areas, Data scientists prefer Python for the following modules:

## Letter of Thanks

To,

Mr. Tejas Gaikwad,

Kanak Digifex,

Ahmednagar.

Dear Sir,

It was really a great privilege to have your presence at 5 days Certificate program on "Data Science" which was held at our Institution From Monday 13/02/2023 to Friday 17/02/2023. I would like to express my gratitude for your valuable Guidance on "Data Science". Your valuable guidance had helped us in past and in future as well. On behalf of the all the faculties of the institution, I greatly appreciate your expert talk and hands on practical session.

I hope the same co-operation from you in near future.

Thanking you.

**Subject:** Invitation as a Resource Person for 5 days Workshop on “Solid Modeling & CAD System.”

Respected Sir,

We are pleased to invite you as a Resource Person for Workshop on “Solid Modeling & CAD System” for our SE students scheduled on **Monday 10/10/2022 to Friday 14/10/2022 at 10:00 am**. Your expertise and knowledge in the area would add a great value to the one and all, especially the budding engineers of the country who require the guidance and path-breaking ideas to lead their way through the tough competition in the Global market on this day.

With your vast and in-depth knowledge in the area, you would be expected to deliver the Workshop on “Solid Modeling & CAD System” as we are aware of your great contribution to this field of work.

We look forward to your presence and guidance in making the event successful.

Thanking you.

Yours faithfully

on

**“Solid Modeling & CAD System”**

Syllabus Details:

Day 1- Monday 10/10/2022	Morning Session	Topic Name:	Introduction to Solid Modeling
		Content	Basics of solid Modeling Product design, Product life Cycle
	Afternoon Session	Topic Name:	Introduction to different 3D Modeling CAD Software
		Content	CATIA, CREO-Parametric, Nx-CAD, Solid works
	Evening Session	Topic Name:	Understand CATIA Software
		Content	What is CATIA V5, CATIA User Interface
Day 2- Tuesday 11/10/2022	Morning Session	Topic Name:	Introduction of 2D Sketch
		Content	Geometry Creation, Geometry Operations
	Afternoon Session	Topic Name:	Profile Creation
		Content	Create a new Part, Constrain the Sketch
	Evening Session	Topic Name:	Practice Session
	Day 3- Wednesday 12/10/2022	Morning Session	Topic Name:
Content			Create Pad, Pocket Features, Create Holes, Create Fillets and Chamfers
Afternoon Session		Topic Name:	Additional Part Features
		Content	Create Feature Profiles and Axis System, Create Multi-profile Sketch Features, Create Wireframe Geometry, Create Shaft and Groove Features, Shell the Model
Evening Session		Topic Name:	Practice Session

Day 4- Thursday 13/10/2022	Morning Session	Topic Name:	Part Design Module
		Content	Basic Features, Additional Part Features
	Afternoon Session	Topic Name:	Design of Complex Parts
		Content	Create Advanced Sketch-Based Features, Advance Dress-Up Features
	Evening Session	Topic Name:	Practice Session
	Day 5- Friday 14/10/2022	Morning Session	Topic Name:
Content			Create a new CAD Product, Assemble in the Base Component, Assemble and Fully Constrain Components, Save the Assembly
Afternoon Session		Topic Name:	Drafting
		Content	The Drawing Environment, Drafting Toolbars and Objects, Start a New Drawing, Setting the Drawing Sheet Format and Drafting Standards, Starting a Drawing with a Blank Sheet, Sheet Properties, Drawing Title Blocks, 2D Catalogs, Inserting Catalog Items, Create Views, Types of Views,

CADD CENTRE Ahmednagar

Dear Sir,

It was really a great privilege to have your presence at Workshop on "Solid Modeling & CAD System." which was held at our Institution on Monday 10/10/2022 to Friday 14/10/2022. I would like to express my gratitude for your valuable expert session on "Solid Modeling & CAD System." Your valuable guidance had helped us in past and in future as well. On behalf of the all the faculties of the institution, I greatly appreciate your expert talk.

I hope the same co-operation from you in near future.

Thanking you.

**Subject: Invitation as a Resource Person for 5 days Workshop on "Application of Artificial Intelligence & Machine Learning in Mechanical Engineering"**

Respected Sir,

We are pleased to invite you as a Resource Person for the Seminar on "**Application of Artificial Intelligence & Machine Learning in Mechanical Engineering**" for our TE Mechanical students scheduled on **Monday 06/02/2023 to Friday 10/02/2023**. Your expertise and knowledge in the area would add a great value to the one and all, especially the budding engineers of the country who require the guidance and path-breaking ideas to lead their way through the tough competition in the Global market on this day.

With your vast and in-depth knowledge in the area, you would be expected to deliver the 5 days workshop on the "**Application of Artificial Intelligence & Machine Learning in Mechanical Engineering**" as we are aware of your great contribution to this field of work.

We look forward to your presence and guidance in making the event successful.

Thanking you.

Department of Mechanical Engineering

**5 Days Workshop**

on

**“Application of AIML in Mechanical Engineering”**

Syllabus Details:

Day 1 06/02/2023	Morning Session	Topic Name:	Introduction to AI & ML
		Content	Introduction to AI, Types of AI, Introduction to ML, Types of ML, Supervised learning, Unsupervised learning, Reinforcement learning.
	Afternoon Session	Topic Name:	Feature Extraction & feature selection
		Content	Introduction to Feature Extraction & feature selection Statistical features, PCA, Decision tree, Applications of feature extraction and selection algorithms in Mechanical Engineering
	Evening Session	Topic Name:	Common Application of AIML
		Content	Application of AIML in Agriculture, Medical, defense, etc.
Day 2 07/02/2023	Morning Session	Topic Name:	Classification & Regression
		Content	Introduction to Classification & Regression, different Algorithms, Decision tree, Random forest, Naive Bayes, Support vector machine, etc, Applications of classification and regression algorithms in Mechanical Engineering
	Afternoon Session	Topic Name:	Development of ML Model
		Content	Steps in ML modeling, Data Collection, Data pre-processing, Model Selection, Model training, Model evaluation.
	Evening Session	Topic Name:	Reinforced Learning & Applications of Reinforced Learning
		Content	Characteristics of reinforced learning; Algorithms, Q Learning, Applications of Reinforced Learning

Day 3 07/02/2023	Morning Session	Topic Name:	Deep Learning Applications of Deep Learning
		Content	Characteristics of Deep Learning, methods, Application of Deep Learning in different fields of engineering sector.
	Afternoon Session	Topic Name:	ANN & CNN
		Content	Artificial Neural Network, Convolution Neural Network, World wide Applications of ANN & CNN
	Evening Session	Topic Name:	Applications of AI in image based part Classification
		Content	Applications of AI in medical imaging, object identification in satellite images, etc
Day 4 08/02/2023	Morning Session	Topic Name:	Applications of AI in Manufacturing
		Content	Applications of AI in Manufacturing, Production Systems, Inventory Management, etc
	Afternoon Session	Topic Name:	Applications of AI in Predictive Maintenance
		Content	AI to analyze the information and output maintenance , AI solutions can analyze current operational conditions
	Evening Session	Topic Name:	Applications of AI in process optimization and Role of AI in Conditioning Monitoring
		Content	Applications of AI in process optimization like process management, support organizational strategies Artificial intelligence (AI) as a tool of machine condition monitoring and fault diagnosis
Day 5 09/02/2023	Morning Session	Topic Name:	Applications of AI in Material Inspection
		Content	Applications of AI in Material Inspection like Product Defect Detection, misalignments, faulty welds, or assembly errors,
	Afternoon Session	Topic Name:	Applications of AI in Fault Detection and Implementation of Sensor Fault Detection
		Content	Applications of AI as Powerful tools for automating fault detection and prediction processes, implementation of Sensor Fault Detection
	Evening Session	Topic Name:	Applications of AI in Traffic Control
		Content	Traffic Prediction Models. Machine Learning Models. Data Sources used in Predictions, Traffic Signal Optimization. Coordinated Progressive Signaling.

Dear Madam,

It was really a great privilege to have your presence at Workshop on "Application of Artificial Intelligence & Machine Learning in Mechanical Engineering" which was held at our Institution on Monday 06/02/2023 to Friday 10/02/2023. I would like to express my gratitude for your valuable speech/presentation on "Application of Artificial Intelligence & Machine Learning in Mechanical Engineering". Your valuable guidance had helped us in past and in future as well. On behalf of the all the faculties of our institution, I greatly appreciate your expert talk.

I hope the same co-operation from you in near future.

Thanking you,

Yours faithfully,
