Industrial Visit Report to Digital Ion Zone TCS

Our Department had organized an Industrial Visit for the Students of Diploma & Degree of Computer Department to TCS along with 9 Staff Members (Prof.Y.A.Sisodia, Prof N.B.Gade,A.Adsure, Prof P.Faulsunder ,Prof R.Ghadage,Mr.jadhav A.,swapnil Satpute, Prof Walke S.)And 150 Students. The Visit was organized on 13/12/2022 at Digital Ion Zone TCS, Hadapsar, and Pune.

TCS iON Digital Exams Solution digitizes and automates end-to-end University and Board Examination Processes. It enables the secure creation and Distribution of Question Papers. The solution reduces administrative efforts and costs by automating processes such as Student registration, Exam center allocation, Hall Ticket issuance, Question Paper Logistics Planning, Exam-day Management, and Results Management.

Ion Digital Zone in Ramteki, Hadapsar, Pune is one of the leading Businesses in the Online Examination Centers, Computer Networking and Training Institutes.

The Industrial Visit was in Two Sessions:-

1. A Seminar was arranged in Two Sessions & the following Concepts were explained in brief.

- Networking Systems, Types of Network & it's Topology
- Procedure for Candidate for Examination
- Switches & Routers
- Details of TCS's iON Operating System
- Latest Trends in I.T Sectors for Fresher's as a Job Profile

2.Students were divided in Sections to visit their Server Room and their different Examination Centres.

3.Outcome :-

- i. Student's Queries were solved
- ii. Students got an deep acquaintance of the real time processes in Industry.
- iii. Students were motivated to work in various Software Fields in Corporate.
- iv. Links will be sent to Register Students for making a Career in TCS.

Subject – Regarding Permission for industrial visit at your Cold storage Plant.

Respected Sir,

Shri. Chhatrapati Shivaji Maharaj College of Engineering, Ahmednagar is established in year 2011 by Ahmednagar Jilha Maratha Vidya Prasarak Samaj, Ahmednagar. The college is approved by AICTE, New Delhi, Recognized by DTE, Mumbai and affiliated to University of Pune, Pune. The college runs four branches of engineering viz. Civil Engineering, Computer Engineering, E&TC Engineering and Mechanical Engineering with intake of 60 students each.

As per the curriculum of Savitribai Phule Pune University, a visit to Cold storage Plant Under the subject of Heating, Ventilation & Air conditioning is mandatory for the student of final year Mechanical Engineering.

I kindly request you to permit our 48 Final year Mechanical Engineering student for visit to your Cold storage Plant. Our two staff members will also accompany them. You are also requested to spare technical person to give information about Cold storage Plant.

Your help in this regard is highly appreciated. Thanking you in anticipation.

Swami Tyers

Wheel balancing is something which is strictly concerned with the wheel and the tyre correlation. It refers to correcting the imbalance between The weights of the wheel and the tyre. Balancing is always done alongside wheel alignment to keep the weight and alignment coordination in sync.

Maintaining a balanced weight in the wheel/tyre combination is significant for a smooth and stable drive, less tyre wear and eliminating vibrations. Unbalanced tyres increase the risk of wheel and suspension damage massively.then been known name in its field. The business strives to make for a positive experience through its offerings.

How is misalignment corrected?

Misalignment happens when the angle of the tyres of your ride is off from the linear position they are in. So to correct it, the technician is majorly concerned with three aspects:

Caster angle: It is the angular displacement between the steering's axis and the vertical axis of the wheels being steered. This is concerned with maintaining stability and balance while steering the car. The mechanic tends to find the fine balance bet positive caster angle and negative caster angle to correct misalignment.

Camber angle: it is concerned with mending the angular proportions between the wheels vertical axis and the vertical axis of the car when viewed from the front.

Toe Angle: this is the angle which the tyres make while moving outwards or inwards with the longitudinal axis of the vehicle when viewed from a top angle.

Once all the three angles get back in sync, the suitable wheel alignment is achieved.

Being the second largest producer of fruits and vegetables in the world, India touches the production of approximately 260 million metric tons annually India is also the world's largest producer of milk and fruits. Still the nation witness nearly 4.6-15.9% wastage is due to lack of cold storage infrastructure.

Objective of cold storage:

- Prolonging Shelf life of fruits and vegetables.
- Temperature control
- Cost effective
- Transportation of products
- Storage for chemicals. And many more

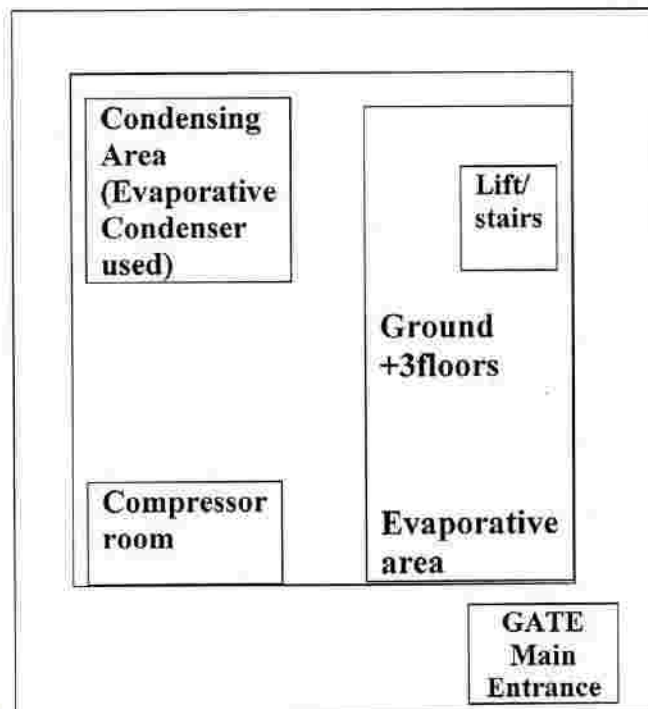

Sahib ice and cold storage in Ahmednagar, is known to satisfactorily cater to the demands of its customer base. The firm came in to existence in 2013 and has, since

then been known name in its field. The business strives to make for a positive experience through its offerings.

Sahib cold storage is popular cold storage in Ahmednagar Maharashtra. Cold storage is a facility in which fruits and vegetables can be preserved for a longer duration. The cold storage are categorized for two types, first is used for single product and the other is for multiple products. AIM

Visit to Pumping Station and Water treatment plant.

PROBLEM STATEMENT

To understand working of water treatment plant and pumping station.

Theory:

Pumping stations in a water distribution system are necessary where water is pumped directly into the system (e.g. from a lake) or where pressure has to be increased because there is an insufficient difference in water levels in gravity flow distribution systems. There are two general types of pumps: vertical turbine pumps and centrifugal pumps. Capital costs are high, but the most expensive part is the energy supply for pumps (mostly electrical). Therefore, it is very important that pumps have a high degree of efficiency and are maintained properly. To guarantee safe water quality, cross connection of drinking water and waste removal systems must be avoided.

Water Treatment Plant detail information:

The water treatment plant get raw water from mula dam at since the water is gone under aeration process which is removal & inclusion of O₂ is done than as the it gone through

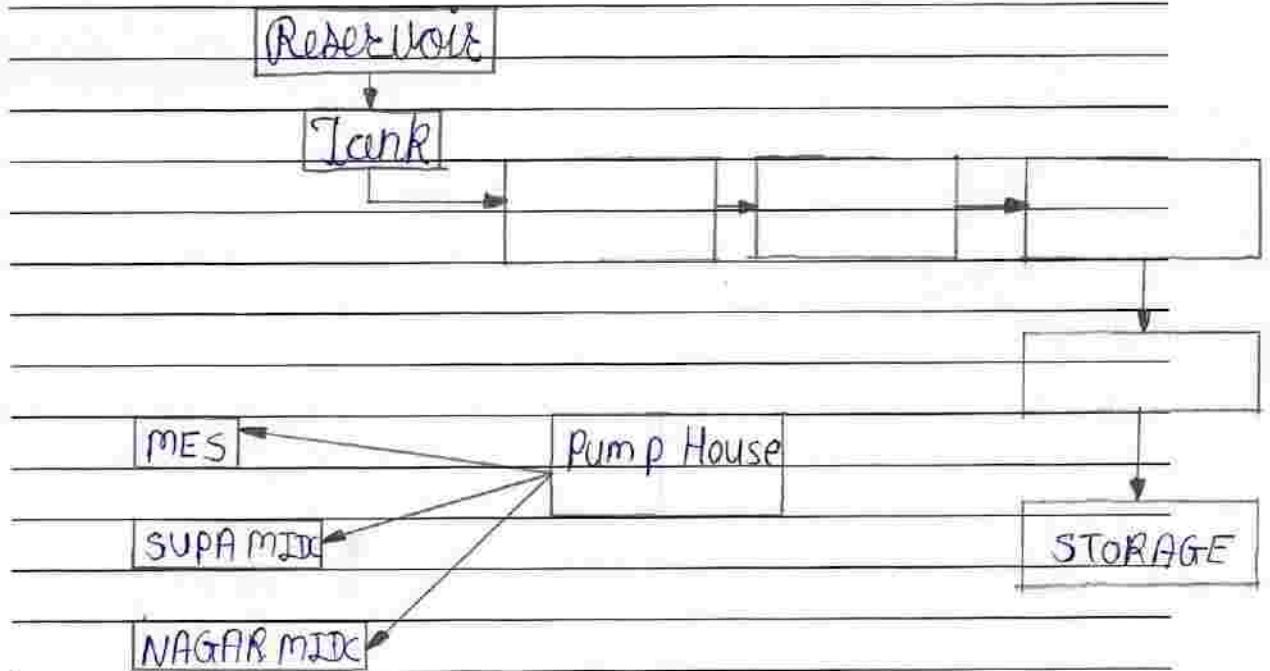

sedi mentation in week upto 3 & had to remove dirt then gravitational situation.

Water Pumping Station detail information:

The water pumping station of the pumps at 5 of 50HP & 2 of 20HP the 200HP pump the water to deliver water to the pump house & remaining used to deliver the water to now fill the head of near by MIDC.

Process in Water treatment and pumping station (flow diagram):

A handwritten signature or scribble in blue ink, consisting of a series of loops and a long horizontal stroke.

Conclusion:

In this experiment we understand the working of water treatment plant & its processes pump house working.
