**REPORT ON INDUCTION PROGRAM FOR FIRST YEAR ENGINEERING  
STUDENTS ADMITTED DURING THE ACADEMIC YEAR 2022-23**

**ABOUT INDUCTION PROGRAMME**

The induction programme was brought in with a view to uplift the level of the entrants to an elevated stage, promote all-round development and exposing learners' stigmas to minimize and to maximize their learning. Learners come with diverse thoughts, backgrounds & perceptions. Hence it becomes important to help them adjust to the new environment & inculcate the ethos of the institution with a sense of larger purpose. That is where the lacuna lies which demands a program dynamic enough to address the issue.

One Weeks Induction Programme was conducted by Shri. Chhatrapati Shivaji Maharaj College of Engineering for the First Year Engineering Students (2022-23 Batch) from 7<sup>th</sup> November to 12<sup>th</sup> September 2022. A spectrum of sessions had been organised under the Induction programme and were presented by eminent speakers from their respective fields. SCSMCOE has programme with an objective to provide ample of time and a platform for the transition of students from school to the hard-core engineering. An induction programme is a harbinger of various in-campus & off-campus activities specially designed for entrants to fill the gap.

**SCHEDULE OF INDUCTION PROGRAMME**

The schedule of the Induction program was discussed by Dr. M .K. Bhosale . She explained the details of the events to be conducted on daily basis and explained the need of Induction/Orientation program when students have to adapt to transition from school to university life. The students were explained with the following needs that may be covered during the induction program for the betterment of the students:

1. To know about academic and social issues.
  2. To help understand the academic environment.
  3. To help recognize skills required to do well.
  4. To generate interest in respective areas of study.
  5. To make feel confident about the future.

In second session of the workshop, the department of Electronics & Telecommunication had organised an expert lecture on "Cloud Computing" and the expert person were Mr. P. B. Deshmukh. In this interactive session the students were given a brief description of Introduction of Cloud Computing, Need of Cloud Computing, Different types of Cloud Computing, Roles of Cloud Computing.

He explained what the cloud computing exactly mean in real life. He told a cloud is a virtualized server pool which can provide the different computing resources of their clients. Users of this system need only be concerned with the computing service being asked for. He further discussed different types of cloud computing. Also he motivated students that cloud computing enables innovation by alleviating the need of innovators to find resources to develop, test, and make their innovations available to the user community. The students were provided the information on cloud computing where he told the students about the growing need of computers in our day to day life so the computing resources that we need also go up.

At the conclusion of the session the doubt clearing was held in which the students got an opportunity to put forward questions to satisfy their curiosity. The overall session was enlightening and the students enjoyed it. The session ended with thank you note by expressing gratitude to Mr. P. B. Deshmukh for taking out time from his busy schedule and making the students aware of the basics of Cloud Computing.

**Session : V**

**Topic : “Green Fuel – DEE/Biodiesel”**

**Resource Person : Dr. B. R. Varpe**  
(Asst. Professor, Sangamner)

We know that green fuels also called green hydrocarbons, biofuels, are fuel produced from biomass sources through a variety of biological and thermochemical processes. Dr. B. R. Varpe focused on some important points on green fuels such as these products are similar to petroleum gasoline and diesel fuels and are therefore considered fully infrastructure compatible fuels. They can be utilized in engines without engine modification. Dr. B. R. Varpe presented a comprehensive review on the potential of biodiesel from different waste feedstock biodiesel such as waste cooking oil and waste plastic oil. Furthermore, he has explained the effect on the engine performance, combustion and exhaust emissions including details of engine and operating condition. Main intention behind this presentation was to provide

information to the engineers, industrialists and researchers who are interested on waste biodiesel and to prominence waste biodiesel as a promising alternative replacement for fossil fuels.

**Session : VI**

**Topic : “Magnetic Bearing”**

**Resource Person : Dr. S.N. Shelke**  
(HOD, Loni)

Dr. S. N. Shelke discussed about a magnetic bearing. Magnetic bearings support moving parts without physical contact. For instance, they are able to levitate a rotating shaft and permit relative motion with very low friction and no mechanical wear. Magnetic bearings support the highest speeds of any kind of bearing and have no maximum relative speed. Dr. S. N. Shelke explains the

advantages of Active bearings & Passive magnetic bearings. He added the Techniques using diamagnetic materials are relatively undeveloped and strongly depend on material characteristics. As a result, most magnetic bearings are active magnetic bearings, using electromagnets which require continuous power input and an active control system to keep the load stable. While speaking on applications he said that Magnetic bearings are used in several industrial applications such as electrical power generation, petroleum refinement, machine tool operation and natural gas handling. They are also used in the Zippe-type centrifuge, for uranium enrichment and in turbo molecular pumps, where oil-lubricated bearings would be a source of contamination
