Roll No:-23

Department of civil Engineering

A.Y:- 2022-2023

Day & Date: - Wednesday, 09th Nov 2022

Visit to: - "Water Treatment Plant".

Visit at: - Water Treatment Plant MIDC Ahmednagar.

Visit Under Subject: - Water Supply Engineering.

Staff In Charge.: - Prof. S. S. Pagare, Prof. S. A. Jagtap.

Aim: -

This visit is arranged, to give extra practical knowledge & to know more about the information of "water treatment plant". Mr. Datta Shende, filter inspector & Mr. Sudhakar Pawar, Scada operator. Has given a deep knowledge of each unit of water treatment plan, from aeration of water to portable water. He also told that water treatment plant is a multifaceted engineering discipline dealing with the design, construction, and operation of all types of filtration units. It encompasses a wide range of engineering disciplines, including civil engineering, computer engineering, electrical engineering, mechanical engineering, industrial engineering, and production engineering.

He has showed the various units of the water treatment plant such as following-

1. Aeration: -

Aeration is the process by which air is circulated through, mixed with or dissolved in a liquid or substance.

Aeration is used in liquid, soils and foods to improve quality and reduce

There are two types of aeration are as follows: -

A) Natural aeration (cascade type): -

This type of aerator work done naturally such as removing smells & dissolved oxygen from air. Water by gravity comes on the plant from intake well. Water can aerate in this aeration unit.

B) Artificial aeration (air diffusion type): -

This type of aerator get water by gravity same as above but the process of aeration is different. In this method perforated pipes are fixed in the tank & mixed air water due to upward moment of air remove CO₂, dirty smell and mixed oxygen.

Fig. Natural Aerators

Fig. Artificial Aerators.

2. Flash mixtures: -

In the treatment plant raw water are having very low turbidity in all seasons. It is within the permissible limit that is >1 so they do not add coagulation water.

Fig. Flash Mixer

3. Clarifocculator (sedimentation): -

Sedimentation is the process of depositing sediment. It is a treatment process in which the velocity of the water is lowered below the suspension velocity and the suspended particles settle out of the water due to gravity, centrifugal acceleration or electromagnetism. We can see circular sedimentation tank. 3-4 retain water in this tank for setting the particles or sediments.

Fig. Clarifocculator.

4. Filtration: -

Filtrations any of various mechanical, physical or biological operations that separate solids from fluids (liquid or gases) by adding a medium through which only the fluid can pass. The fluid that passes through is called the filtrate.

We can see four-layer rapid sand filter bed such as follows: -

1. Gravel
2. Medium gravel.
3. Sand
4. Fine sand

These four layers are in this filter bed. this is rapid sand filter so they can do back washing 5-6 days or as per requirement. When water level can rise in the filtration unit i.e., rate of filtration can be slow then the can done back washing.

Fig. Rapid Sand Filtration Bed.

5. Disinfection (chlorination): -

It is the method of disinfection by which the micro-organisms are killed if chlorine & its components are used.

Generally, in raw water E- coil bacteria are found. Which is very harmful so disinfection is required. Disinfection unit having liquid chlorine tank. Chlorine added in water in pre-determination quantity. Chlorine reaction with water are as follows:

-

This hypochlorous is kill visible & non-visible bacteria. Then disinfection take place.

Fig. Chlorination Process Unit.

6. Underground storage tank: -

There are four large size underground storage tank. Then that treated water can store in underground storage tank.

7. Pumping house, elevated storage tank & distribution: -

Water which is store in underground storage tank that can be pumped in elevated storage tank.

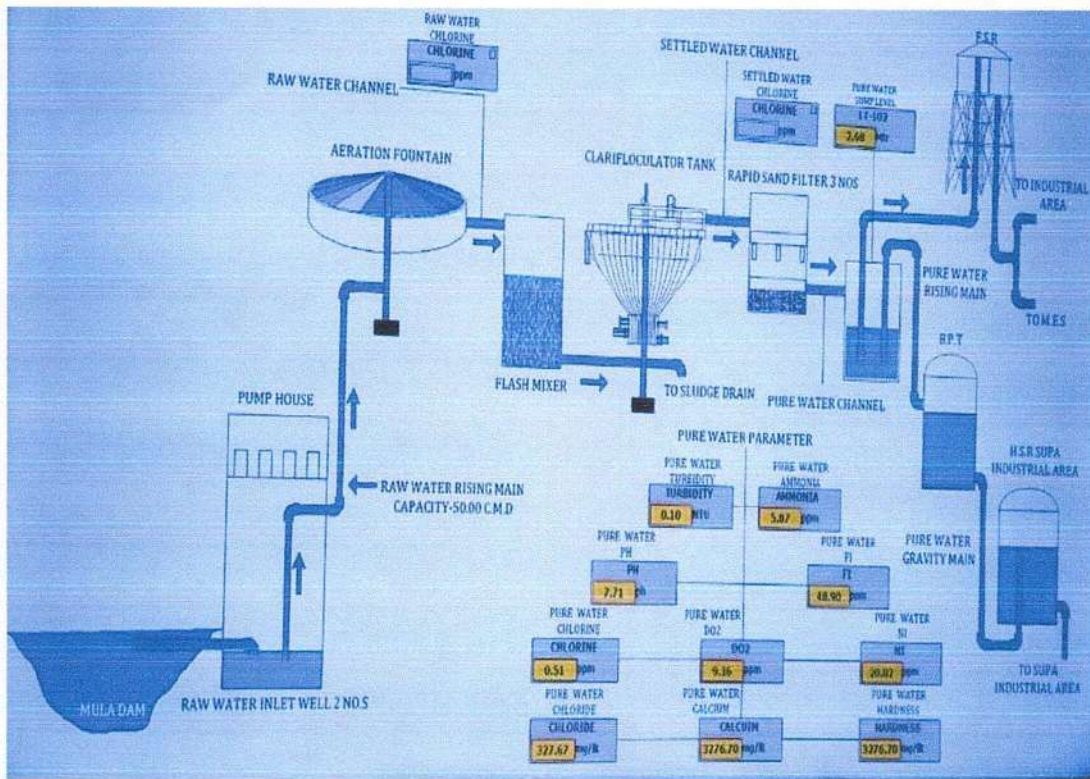

There are two elevated storage tanks. they having capacity of 13,50,000 lit each.

Then water can be distributed from elevated storage tank by gravity to all city.

Fig. Elevated Storage Tank Of 13,50,000 Lit Capacity Each.

Summary: -

After visiting the site, we fully understand the practical aspect of water treatment plant & its units in comparison to theory aspect in book. The different types of method implemented on the plant at units.

Event Report:-

The students of the college undertook a cleanliness campaign of the college campus on 15 October 2022. Under this programme, all the students from SCSMCOE NSS members had participated. Even teachers were the essential part of this drive.

The aim to organize this campaign was to make student aware about cleanness. Clean Campus promotes Hygiene, It improves hygiene level in campus and also helps to reduce the spread of sickness, maintaining a clean college environment sets a good example to students. Cleanliness encourages learners to take pride in their college, which makes them less likely to drop litter and as such they will potentially make a bigger effort to maintain their environment.

The cleanliness campaign was initiated by the Principal. Our Principal Dr. Y. R. Kharde started the program by cleaning the corners of the playground. Groups assigned as four departments namely civil engineering, computer engineering, mechanical engineering and electronics and telecommunication engineering into four group. Then the area of the college is divided into these groups for cleaning. Then the teachers and students followed suit. Some of us picked brooms and started our job. Some of the students did the dusting of the rooms. And others went to the playground and started picking wrappers lying scattered there. After collecting them they threw them in to the

dustbins. After doing this job for two to three hours, we all assembled in the seminar hall. Thereafter our Principal delivered the speech telling us the importance of sanitation. He also honored the sweepers of the school for their noble job. In the end we all took oath of keeping our home, locality, and city clean. It was a unique experience for all of us. We were curious to be the part of this great drive that could have transformed the face of our country forever. Prof. A.K. Kulkani sir given the vote of thanks and declared program was ended.

Like every year, this year also all the students and faculty members of our College had organized a grand program on the occasion of this 74th Republic Day. The Constitution was adopted by the Indian Constituent Assembly on 26th November 1949 and came into effect on 26th January 1950 with a democratic government system. . Everyone was feeling very happy that day because it was a matter of great pride for all of us because on 26 January 1950 the Constitution of India came into force and our country, India became a republic. The program started with Flag Hoisting followed by the National Anthem at 8:00 am. We celebrated this day by hosting our National Flag in our college by our Principal.

The Chief Guest of the Program Dr. Y. R. Kharde (Principal) hoisted the National flag and gave a inspirational talk on republic day.

Students celebrated this auspicious day by giving a speech about the republic day, Patriotic songs. The program concluded with the National Song.

The Republic Day thanks note was given by Prof. G. S. Patil (NSS Co-Co-ordinator). The program concluded with the National Song.

Event Report:-

In order to make students aware about how to deal with stress Shri Chhatrapati Shivaji Maharaj College of Engineering had organized a guest lecture on Stress Busting : Living a Stress free life. The Name of the speaker was Mr. Girish Kukreja. Prof. G. S. Patil had introduced the speaker Mr. Girish Kukreja. After that Principal Dr. Y. R Kharde had felicitated the guest. It was attended by Teaching, Non-teaching faculty members and Students of the college with great enthusiasm.

Then after Mr. Girish Kukreja Sir started the session. He guided us how stress occurs. How our mental health is necessary. Try these 10 stress-busting suggestions: he given a ten keys of stress busting Be active. Exercise won't make your stress disappear, but it can reduce some of the emotional intensity that you're feeling, clearing your thoughts and letting you deal with your problems more calmly. Get started with exercise, take control If you think you cannot do anything about your problem, your stress can get worse.

That feeling of loss of control is one of the main causes of stress and lack of wellbeing. The act of taking control is empowering, and it is a crucial part of finding a solution that satisfies you and not someone else. Connect with people. A good support network of colleagues, friends and family can ease your work troubles and help you see things in a different way. The activities we do with friends can help us relax and relieve stress. Talking things through with a

friend may also help you find solutions to your problems. Read about 5 steps to mental wellbeing, including the benefits of connecting with other people. Have some "me time" Many of us work long hours, meaning we often don't spend enough time doing things we really enjoy.

It's important to take some time for socialising, relaxation or exercise. You could try setting aside a couple of nights a week for some quality "me time" away from work. Challenge yourself setting yourself goals and challenges, whether at work or outside, such as learning a new language or a new sport, can help build confidence. This may help you deal with stress. It can also make you want to do things and be active. Avoid unhealthy habits they might provide temporary relief, but in the long term, these crutches will not solve your problems. They will just create new ones.

Help other people if you do not have time to volunteer, try to do someone a favour every day. It can be something as small as helping someone cross the road or going on a coffee run for colleagues.

The event ended with a vote of thanks given by Prof. S. S. Aagale.
