Abstract

This paper presents the modeling and optimization of quarter car suspension system using Macpherson strut. A mathematical model of quarter car is developed, simulated and optimized in Matlab/Simulink® environment. The results are validated using test rig. The suspension system parameters are optimized using a genetic algorithm for objective functions viz. vibration dose value (VDV), frequency weighted root mean square acceleration (hereafter

WEB OF SCIENCE™

Journal of Engineering Science and Technology (JESTEC) is indexed by SCOPUS since 2010.

Journal of Engineering Science and Technology has been selected for coverage in Clarivate Analytics products and services.

Beginning with 2016, this publication will be indexed and abstracted in:

Emerging Sources Citation Index (ESCI)

ISSN: 1823-4690

Aims & Scope

JESTEC (Journal of Engineering Science and Technology) is a peer-reviewed journal that aims at the publication and dissemination of original research articles on the latest developments in all fields of engineering science and technology. The journal publishes original papers in English, which contribute to the understanding of engineering science and improvement of the engineering technology and education. Papers may be theoretical (including computational), experimental or both. The contribution should be unpublished before and not under consideration for publication elsewhere.
